

CLEARPATH

ICYMI: ClearPath to Tackle Industrial Sector

Washington, DC – Friday, February 12, 2021 – At ClearPath, reducing power-sector emissions has been our primary focus for the past six years and will continue to be; however, this year, **we are excited to add the industrial sector to our portfolio**. Combined with the power sector, this really expands our scope – going from tackling a quarter of U.S. carbon emissions to *half*. [More on why we're doing this](#).

We have added several policy experts to our team in recent months who are excited to dig in as we expand into tackling industrial sector emissions. Our team is available and ready to be a resource for reporting on technologies to reduce emissions from heavy industry, particularly metals, concrete and cement, and of course, hydrogen.

Our Industrial Experts:

- [Rich Powell](#), Executive Director
- [Jeremy Harrell](#), Managing Director of Policy
- [Justin Ong](#), Program Director, CCUS and Heavy Industry

Recent new hires who will support our industrial emissions policy work:

- [Alex Fitzsimmons](#), Senior Program Director, Storage and Renewables
- [Spencer Nelson](#), Senior Research Director
- [Jena Lococo](#), Policy Analyst, CCUS and Regulatory Reforms
- [Savita Bowman](#), Policy Analyst, CCUS
- [Natalie Houghtalen](#), Policy Analyst

We will continue to roll out whitepapers and additional content on the different technologies over the next few months, but here are a few resources to start.

Our Industrial Resources:

- [Why ClearPath is Tackling the Industrial Sector](#) – Rich Powell explains why we're doing this.
- [Hydrogen is H₂OT – Everything You Need to Know](#) – Hydrogen 101
- [Clean Energy Manufacturing Should be Done in America, Not China](#) – Alex Fitzsimmons does a deep dive on how DOE's Advanced Manufacturing Office (AMO) is well-positioned to accelerate clean energy innovation

ABOUT CLEARPATH

ClearPath (501(c)(3)) was established by businessman Jay Faison in 2014. ClearPath's vision is that America leads in affordably powering the world with reliable clean energy. ClearPath's mission is to develop and advance conservative policies that accelerate clean energy innovation. To advance that mission, ClearPath develops cutting-edge policy and collaborates with academics and industry. Learn more at clearpath.org.
